Advanced Certificate in Audio Engineering:
(This program commences in 2012)

The Advanced Certificate in Audio Engineering course is a 1-year course designed as a profession of learning in the Audio Engineering field and the entry requirements are a Higher certificate in that field.

This qualification is primarily vocational, or industry oriented. The qualification provides students with a sound knowledge base in the field or discipline of Audio Engineering and the ability to apply their knowledge and skills to particular career or professional contexts, while equipping them to undertake more specialized and intensive learning. Programs leading to this qualification tend to have a strong vocational, professional or career focus and holders of this qualification are normally prepared to enter a specific niche in the audio industry. Advanced Certificate program typically include a simulated work experience or a work integrated learning component. This will be achieved in the form of internships and project work done in our recording studios, labs and work areas.

Diploma in Audio Engineering
(This program commences in 2012)

The Diploma course is an intensive 3-year program offering specialization within the audio industry.

This qualification is primarily professional, vocational or industry specific. The purpose of the Diploma course is to develop graduates who can demonstrate focused knowledge and skills in the Audio Engineering field. Typically they will have gained experience in applying such knowledge and skills in a workplace context. A depth and specialization of knowledge, together with practical skills and experience in the workplace, enable successful students to enter a number of career paths and to apply their learning to particular employment contexts from the outset. The Diploma in Audio Engineering course includes a simulated work experience in our studios, labs and work areas. The work integrated learning component will comprise the completion of a full album or a feature film collaborating with clients in a real world situation.
